

PropTech Solutions

PPW, XactPRM, Pruvan, PropX,
Respond MAP, Touchstone

Manage property decisions and processes with real-time insight.

Verisk's suite of PropTech solutions streamlines field service management, property preservation, and default servicing operations, enabling users to make informed property decisions with unparalleled insights. These solutions facilitate accurate repair estimates and ensure faster, easier property preservation processes.

PPW

Comprehensive workflow management platform that revolutionizes how you create, track, and manage inspection, property preservation, repair, and maintenance tasks.

PropX

A robust database of qualified information—including market value, historical data, property characteristics and permit data. With over 270 specific data points delivered in real-time.

XactPRM

Cost estimating platform designed to minimize bid denials and boost profitability. Backed by a dedicated team of ~50 experts, our pricing is meticulously researched and updated monthly for accuracy and reliability.

Respond MAP

Be well-informed on live weather through a visualized command center, providing crucial insights for storm severity analysis and response planning.

Pruvan

Simplify data collection, photo gathering, and field results with our user-friendly mobile app that can be tied to a system of record. Stay in the loop with real-time project progress tracking.

Touchstone

Catastrophe modeling and risk assessment platform designed to perform advanced analytics empowering you to gain insights and improve your risk management decisions.
