

XactRebuild: Automated rebuild estimates for a faster recovery

Rebuild estimates you can trust

XactRebuild® is exclusively available to users of Xactimate® Professional. This powerful addition streamlines the water mitigation claims process with automated rebuild estimates that are precise and consistent. Produce an accurate rebuild estimate in minutes, simplify recovery, and enhance your efficiency.

With **XactRebuild**, you can:

Eliminate your paper claims: XactRebuild's digital model results in a quicker turnaround for your estimates while reducing errors.

Achieve greater transparency: Industry comparison reports for rebuild estimates provide greater communication for all involved.

Enhance estimate accuracy: Understand the estimate's origin and differentiate between manually created and automated estimates to increase your confidence in the reliability of your rebuild reports.

Use a single platform for all of your work: XactRebuild can be used for both program and non-program work.

Use anywhere: XactRebuild is built right into Xactimate Professional, which means that your data is automatically backed up and accessible from any desktop, online or mobile device.

**To start using XactRebuild today, contact Verisk Sales
