

Multi-Roof Analysis: A ProMetrix Enhancement

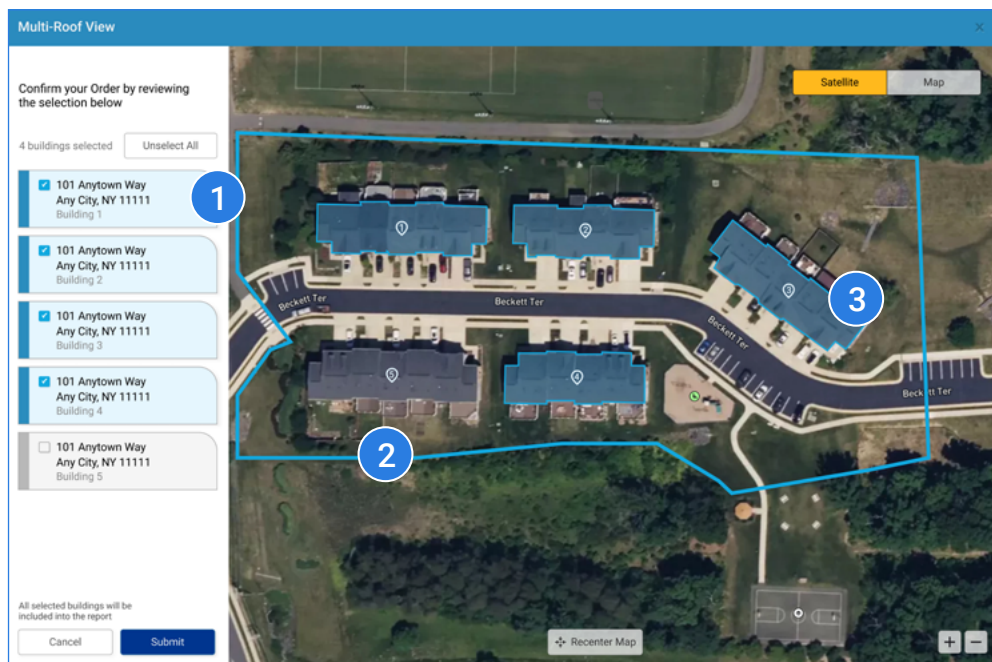

ProMetrix Roof Underwriting Report

In today's complex landscape of insurance risk, it's important to have the most accurate underwriting data. With ProMetrix Multi-Roof Analysis, a new feature to the Roof Underwriting Report, you can get ahead of weather-related claims by leveraging detailed roof risk information.

ProMetrix® Roof Underwriting Report is adding a new and powerful capability to enable your underwriting teams to identify patterns, assess risk, and streamline the process across multiple structures within one location simultaneously.

Full-picture risk assessment

Using the enhanced ProMetrix Roof Underwriting Report, you'll be able to analyze strip malls, retail spaces, and habitation complexes with just a few clicks to select the roofs you want to assess.

Quickly determine aggregated condition scores, risk factors, and replacement cost estimates. It's a revolution—and it's easy with our new interface:

- 1 Type in an address
- 2 Get an aerial view of the property
- 3 Select other specific roofs on the same parcel for more detailed reporting

Data you can trust

The multi-roof enhancement uses our existing proprietary building identification methodology, our trusted technology, and our vast, exclusive database combine to fill the ProMetrix Roof Underwriting Report with detailed, actionable insights such as:

-  Rooftop equipment
-  Notable conditions
-  Change detection over time
-  Roof replacement cost
-  Weather-related analytics
-  Tree coverage
-  Age of roof
