

# Saurabh Khemka

## President, Underwriting Solutions

**Saurabh Khemka** is president of Underwriting Solutions at Verisk, where he leads the Core Lines, Global Underwriting Data and Analytics Solutions, Global Life Solutions, and Verisk Marketing Solutions businesses. In this role, he focuses on delivering innovative data, analytics, and technology capabilities that help insurers build, modernize and optimize insurance programs and underwriting processes worldwide.

Since joining Verisk in 2013, Saurabh has held several leadership positions and spearheaded customer-driven innovation initiatives, including Life Solutions FAST platform enhancements, and the introduction of AI-powered capabilities across underwriting workflows.

Previously, Saurabh served as co-president of Underwriting Solutions. Prior to that, as president of Core Lines Services, he was the principal architect and driving force behind the Core Lines Reimagine initiative—a multi-year initiative to modernize core insurance services including forms, rules and loss costs.

He also led Verisk's Internet of Things (IoT) Solutions division, where he helped grow the Verisk Data Exchange™ into a leading platform for usage-based insurance.

Before joining Verisk, Saurabh was a principal at Bain & Company, advising clients in private equity, technology, and consumer sectors. He holds dual MS degrees in electrical engineering and computer science and engineering systems from MIT, and a BS in mathematics/computer science from Concord University.
